

Surface Disinfectant Refill - Lime

Quaternary Ammonium Active · Quaternary Ammonium Active · with Neutral pH, Ready to Use + Elite Lime Fragrance

KEY BENEFITS

— Quaternary ammonium active	effective surface disinfection against common household contact pathogens — the active class used across professional disinfection applications.
— Elite Lime fragrance	clean, citrus-fresh signal post-disinfection — the sensory confirmation that the surface has been treated.
— Neutral pH	safe on all standard hard surfaces including phone screens, keyboard exteriors, and kitchen counter surfaces.
— 2,500 spray applications per pack	the volume that makes daily disinfection sustainable — not something you ration, but something you do every day.
— Target surfaces	door handles, light switches, desk surfaces, countertops, phone exteriors, tap handles, remote controls.

AT A GLANCE

pH	Neutral
Dilution	Ready to use
Fragrance	Elite Lime
Pack size	5 Litres
Shelf life	24 months from manufacture date, unopened
Safe on	All standard hard surfaces — counters, handles, desks, switches, appliance exteriors
Rinse after use	Not required

HOW TO USE

- 1 Fill**
fill any standard trigger spray bottle from the 5-litre refill pack.
- 2 Target surfaces**
door handles, light switches, desk surfaces, countertops, phone exteriors, tap handles, remote controls.
- 3 Spray**
spray from 20–30 cm distance onto the surface.
- 4 Wipe**
wipe with a clean cloth. No rinsing required.
- 5 Frequency**
daily — once in the morning is sufficient for normal household surface hygiene. Increase frequency during illness or high-exposure periods.

WHY IT WORKS

Quaternary ammonium compounds (QACs) are cationic surfactants that carry a positive electrical charge. The cell membranes of common household bacteria carry a negative charge. The QAC molecule is electrostatically attracted to the bacterial membrane, binds to it, and disrupts the membrane's structural integrity — causing the cell contents to leak and the bacteria to die. This is contact disinfection: the active works on the surface it is applied to, requiring only that the surface be sprayed and the solution allowed to contact the bacterial cell. No scrubbing, no waiting — just spray and wipe.

WHAT YOU GET FROM ONE PACK

2 ml per spray.

One 5-litre pack. 2,500 surface disinfection applications. At approximately 2 ml per spray application and 3 sprays per surface, a single 5L pack delivers over 800 complete surface disinfection sessions covering 8–10 high-touch surfaces. For a home running daily disinfection of common surfaces, one pack lasts approximately 2–3 months. Versus individual 500 ml disinfectant spray bottles, the 5-litre pack reduces per-application cost by over 80%. The habit of daily high-touch surface disinfection, sustained through the year from a single affordable pack, is measurably more effective than occasional intensive disinfection with expensive individual-pack products.

FULL PRODUCT SPECIFICATIONS

Active system	Quaternary ammonium compound + surfactant
pH	Neutral
Dilution	Ready to use
Fragrance	Elite Lime
Safe on	All standard hard surfaces — counters, handles, desks, switches, appliance exteriors
Rinse after use	Not required
Shelf life	24 months from manufacture date, unopened
Pack size	5 Litres

CAUTION & STORAGE

Handle with care.

Keep out of reach of children. Avoid contact with eyes — rinse with water if contact occurs. Do not ingest. Not for skin disinfection. Do not spray onto food or directly onto food-preparation surfaces without subsequent rinsing. Store in original sealed container below 30°C, away from direct sunlight. Keep tightly closed when not in use. Shelf life 24 months from manufacture date, unopened.
