

Bathroom & Tile Cleaner (Lime) 5L

Alle's ClinX Mini Bathroom & Tile Cleaner (Lime) is an alkaline-pH bathroom cleaner that dissolves soap scum, hard-water deposits, and surface grime on ceramic tiles, sinks, and bathroom fixtures through chemistry rather than scrubbing. Ready to use. Lime fragrance. 5-litre value pack.

■ 645 / 5 L

OVERVIEW

Soap scum is calcium stearate — a chemical compound formed when the calcium in hard water reacts with the fatty acids in soap and body wash. It is chemically bonded to the tile surface, not just sitting on top of it.

KEY FEATURES

Alkaline pH 9–10

breaks the chemical bond between soap scum and tile surfaces — the mechanism that makes light wiping as effective as heavy scrubbing with a neutral product.

Ready to use

spray directly onto the surface — no dilution, no measuring, consistent results every application.

Lime fragrance

the fresh, clean post-clean scent that makes a bathroom feel genuinely maintained, not just technically cleaned.

Works on tiles, sinks, and fixtures

one product for the complete bathroom surface range — walls, floor tiles, sink, shower tray, and fixtures.

5-litre value pack

months of bathroom maintenance from a single purchase at significantly lower per-use cost than individual spray packs.

CAUTION & STORAGE

Alkaline product. Keep out of reach of children. Avoid contact with eyes — rinse immediately with water for 15 minutes if contact occurs. Do not use on marble or acid-sensitive stone — the alkaline pH causes surface etching. Do not mix with acid cleaners. Store in original sealed container below 30°C, away from direct sunlight. Keep tightly closed when not in use. Shelf life 24 months from manufacture date, unopened.
