

Multipurpose Cleaner (Lime) 5L

Alle's ClinX Labs Multipurpose Cleaner (Lime) is a neutral-pH institutional surface concentrate that replaces up to three separate surface cleaners with a single SKU. Effective across floors, walls, counters, and fixtures. pH 6.5–7.5. 1:4 dilution. No rinsing required on most surfaces. 5-litre institutional concentrate.

■ 1089 / 5 L

OVERVIEW

Every additional cleaning chemical product in an institutional store carries a management overhead that is rarely quantified at procurement stage: a separate MSDS document, a separate section in the staff training programme, a separate vendor relationship, a separate stock monitoring requirement, and a separate risk of cross-contamination or incorrect application when rotating staff pick up the wrong product. The cleaning chemical programme that looks comprehensive on a specification sheet is often the one that creates the most operational risk on the ground.

KEY FEATURES

Single SKU replaces up to three

floors, walls, counters, and fixtures — one product, one procurement event, one MSDS, one staff training protocol.

Neutral pH 6.5–7.5

safe across the full range of hard surface substrates in healthcare, industrial, and educational environments without substrate damage risk.

1:4 dilution — 5L yields 20 litres

precise, auditable working solution volume for procurement budgeting and cost-per-application tracking.

No rinsing on most surfaces

faster cleaning cycle completion — operationally significant in facilities running 3–4 cleaning rotations daily.

Lime fragrance

appropriate for occupied healthcare, industrial, and educational environments — fresh signal without chemical edge.

PRODUCT SPECIFICATIONS

Active system	Anionic + non-ionic surfactant blend — general purpose
pH	6.5–7.5 (neutral)
Specific gravity	1.00–1.02 at 25°C
Formulation type	Aqueous concentrate
Appearance	Clear to slightly hazy liquid
Fragrance	Lime — calibrated for institutional environments
Dilution	250 ml per litre of water (1:4)

APPLICATION & USAGE

1 Dilution 250 ml per litre of water (1:4 ratio).

2 Floors Apply by mop using overlapping strokes. Allow to air-dry — no rinsing required.

3 Counters and walls Apply by spray bottle or damp cloth. Wipe and allow to air-dry.

4 Washroom fixtures Apply by cloth or spray. Wipe clean — rinsing not required on most fixture surfaces.

5 Heavy soiling Apply undiluted to the affected area, allow 2 minutes contact, then wipe clean. Test on polished marble or sensitive natural stone before full application at concentrate strength.

CAUTION & STORAGE

For professional use. Avoid prolonged skin contact with concentrate. In case of eye contact, rinse immediately with water. Do not ingest. Keep out of reach of children. Test on polished marble or acid-sensitive natural stone surfaces before applying undiluted — neutral pH at concentrate strength may affect sensitive surface finishes. Store in original sealed container below 30°C, away from direct sunlight. Keep container tightly closed when not in use. Shelf life 24 months fr
